

## Joint Event of Hass and Noritake Greek Study Club,

30 Μαΐου 2026 - ZEUS Wyndham Grand Athens

Where Dentistry and Dental Technology Meet

### Επιστημονικό Πρόγραμμα

**09:00 – Εγγραφές - Registration & Welcome Coffee**

**09:30 – 11:00 / CDT Cristian Petri**

*Full digital approach from single crowns to complex oral rehabilitations on implants*

*Πλήρης ψηφιακή προσέγγιση, από μεμονωμένες στεφάνες έως σύνθετες στοματικές αποκαταστάσεις με εμφυτεύματα*

*(An overview of the modern fully digital workflow, from single-unit restorations to complex implant-supported rehabilitations. Digitalization seemed a few years ago to be of the distant future is now becoming mainstream. The use of intra-oral scanners can be seen in a growing number of clinics. But which is its Achilles heel?)*

**11:00 – 11:30 - ☕ Coffee Break**

**11:30 – 13:30 / Nondas Vlachopoulos**

*Layer it or leave it?*

*When monolithic. When Minimal. When Full layering*

*Live voting from the lecture's panel and the audience*

*Πότε μονολιθικό; Πότε ελάχιστη παρέμβαση; Πότε πλήρης διαστρωμάτωση;  
Ζωντανή ψηφοφορία από το πάνελ της διάλεξης και το κοινό*

*(A dynamic, interactive session where real clinical cases are presented and the audience becomes part of the decision-making process. Together with the lecture panel, participants will vote live on the most appropriate restorative strategy—**monolithic, minimal intervention, or full layering**—sparking discussion, critical thinking, and diverse clinical perspectives.)*

**13:30 – 14:30** - 🍴 Lunch Break

*Lunch served at the restaurant of Wyndham Grand Athens*

**14:30 – 15:45 / PD Dr. Adham Elsayed**

*Bonding with Confidence: Success Strategies for Bonding All-Ceramic Restorations in Modern Dentistry*

*Συγκόλληση με Αυτοπεποίθηση: Στρατηγικές Επιτυχίας για τη Συγκόλληση Ολοκεραμικών Αποκαταστάσεων στη Σύγχρονη Οδοντιατρική*

*(Understanding of step-by-step bonding protocols for achieving predictable and long-lasting bonding of all-ceramic materials. Minimally invasive, veneers, partial crowns, full crowns, implant-supported restorations, this session translates scientific evidence into simplified clinical decision-making. An essential update for clinicians and dental technicians who aim to master material selection and adhesive workflows with confidence.)*

**15:45 – 16:45 / DT Anna Dimitriou, MSc**

*Press to Success: Workflow and tips for successful pressable lithium disilicate restorations*

*Press για Επιτυχία: Ροή Εργασίας και Συμβουλές για Επιτυχημένες πρεσαριστές Αποκαταστάσεις Διπυριτικού Λιθίου*

*(A step-by-step approach to the press technique, focusing on workflow optimization and practical tips for achieving predictable, aesthetic, and durable restorations. The lecture emphasizes that success with pressable lithium disilicate lies in mastering both the technical precision and the artistic layering approach.)*

💡 *Joint Educational Event*

[HASS & Noritake Greek Study Club](#)

*Celebrating more than 10 years of continuous professional education*
